
Firefox3 & Dragon NaturallySpeaking

Posted by Ironside - 2008/06/24 17:24

I have just installed Firefox3 and early indications would suggest that Dragon NaturallySpeaking works better than it did with its predecessor. I am writing this message about one hour after installing the new browser so I will reserve judgement until I have tested it thoroughly.

I meant to come on here and change my impression of Firefox3 and Dragon NaturallySpeaking 9.

Dragon NaturallySpeaking 9 works absolutely crap on Firefox three. If anyone can shed some light on why this is happening and if there's a solution, I would be very grateful
